Burlington iNaturalist Challenge May 2020 - Make a unique observation!

Below you will find three species lists. All lists are of species not yet identified in Burlington in the month of May (on iNaturalist). The Late Observation list is of species identified in April, but never in May. The Missing Month list has species seen in April and June, but not May. The Early Observation list contains species found in June, but not as early as May. Are you able to add to our scientifc knowledge of Burlington by finding one of these species outside of its known season?

*Species with asterisks are also part of the Burlington Seasons Clock 2020 Project

Late Observation (49 species Spotted Salamander	Amphibian	Missing Month (4 Gray Tree Frog	Amphibian	Green Frog	Amphibian
